

Account of the trip to the Lakes in April in 1916 by

H. C. Clegg and Porter Johnson.

We left Heber at noon of the third of April. Stopped at A. W. Atkinsons over night. The next day we found snow on the bench below Stewarts 15 inches deep. At Stewarts the ground was bare around the building. We left our horses at Stewart's for \$1.00 per day.

Just above Stewart's house we started on our skis, the snow was from 2 to 3 feet all though the ranch.

At Soap Stone the snow was between 4 and 5 feet, the fence around the rangers pasture was sticking out of the snow about a foot.

We stayed at Soapstone the right of the 4th and started out the next morning in a heavy snow storm.

The snow increased all the way up. At the first flat about 2 miles above Soapstone the snow was 5 feet deep.

At the Meldrum cabins the snow was from 6 to 7 feet. At the corral about 3 miles down from Trial Lake, the snow was deep enough to completely cover the posts and cabin.

We arrived at Trial Lake about 4 or 5 o'clock. The Cabin was located by a mound of snow. After digging four feet down we struck the top center log of the cabin, and dug our way down to the door. The stump with the marks on the measure the snow was completely under snow, we couldnt locate it.

On the sixth we went to Wall Lake to shut the valve. We dug down to locate the house, that was built over the valve. We could not get down to it that day so we came back the next day with a saw and with it and a shovel we dug 12 feet before we struck the house.

The snow was drifted up even with the top of the dam. We estimated the snow at 25 to 30 feet at the valve.

About a foot of fresh snow fell during the 5th and 6th.

At Washington Lake the snow was about the same as at Wall. We estimated the snow on an average of 10 feet above Lake Trial.

On the 8th. we came down to Stewarts in seven hours and went on down to Atkinsons and stayed over night.

Arrived home at noon of the 9th making the trip in six days and taking many pictures all along the way.
